SEVERAL ASPECTS OF AN ANALYSIS OF RISKS IN THE SYSTEM OF ANALYTICAL INTELLIGENCE ACTIVITIES

Paper analyzes the scientific thought regarding the understanding of risks, as well as the need for their analysis and evaluation in modern society. Conceptual analysis is carried out. The connection between risk analysis and analytical intelligence activities is grounded.

The conclusion is drawn that operational decisions are usually influenced by increased amounts of quantitative data, and strategic decisions designed for several years ahead tend to have more uncertainties, while operational decisions that will be taken at a later date will have less uncertainties.

Keywords: risk, risk analysis, risk assessment, threat, vulnerability, analytical intelligence.
