ADMINISTRATIVE AND LEGAL REGULATION OF LIGHT INDUSTRY OF UKRAINE IN THE PRESENT CONDITIONS

Paper considers creation of proper administrative-legal regulation in the field of light industry of Ukraine. In the current context, the urgent issues are the development of appropriate scientific and methodological support for the administrative and legal regulation of the light industry.

The attitudes of domestic and foreign scholars-theorists of administrative law and the system organization of light industry of Ukraine are analyzed. Accordingly, there is a need to study the research methodology.

The author examines the application of a systematic approach to administrative and legal regulation in the field of light industry as the main principle of construction, functioning and development. It is noted that the study of any system objects involves the possession of a relevant conceptual categorical apparatus.

Depending on the role and place in the process of scientific doctrine, meaningful and formal methods are distinguished, which can be classified according to various criteria. The main types of content methodology are considered, which include the methods of philosophical, general scientific, general and special-scientific, as well as empirical and theoretical, fundamental and applied methods of research and methods of presentation of results.

Scientific novelty consists in determining the system of light industry in Ukraine as a complex of elements with their properties, the interaction between which causes the emergence of integrity. The definition of a narrow understanding of the administrative and legal regulation in the field of light industry is an orderly direction of the state's influence on social relations in the field of the organization and operation of light industry, the boundaries and nature of which are due to inter-sectoral nature, which consists in the organization of an efficient activity of light industry and control over its development.

The conclusions state that the administrative and legal regulation of the sphere of light industry of Ukraine can be isolated into a system that will be finite by a plurality of functional elements and relations between them, which are separated from the environment in accordance with a certain goal within the present.

Keywords: administrative and legal regulation in the field of light industry, element of methodology, system organization of light industry, public relations.
