**COMPONENTS OF THE MECHANISM OF ADMINISTRATIVE  
AND LEGAL REGULATION IN THE FIELD OF SAFETY OF  
INDUSTRIAL PRODUCTS OF UKRAINE**

Paper is devoted to the definition of the components of the mechanism of administrative and legal regulation in the field of safety of industrial products in Ukraine. The author analyzes such general concepts as “mechanism” and “mechanism of administrative-

legal regulation” on the basis of scientific sources and, based on their definitions, provides an interpretation of the concept of “mechanism of administrative and legal regulation in the field of safety of industrial products”.

The author, researching popular science publications, defines the main components of the mechanism of administrative and legal regulation in the field of safety of industrial products, such as the norms of administrative law, acts of the implementation of the rules of law and administrative relations. Basic elements of administrative and legal norms are considered in detail, namely the hypothesis, dispositions and sanctions. Among the acts of an implementation of the rules of law the use is considered as an element. The author’s legal relationship, arising in the field of safety of industrial products, is divided into regulatory and law-enforcement ones.

In studying the components of the mechanism of administrative and legal regulation in the field of safety of industrial products, such research methods as analytical methods of comparison and observation have been used.

Scientific novelty consists in defining the notion of “mechanism of administrative and legal regulation” through the prism of the scope of safety of industrial products. For each of the elements considered as a part of the mechanism of administrative and legal regulation, the author gives examples of use of existing Ukrainian legislation.

According to the results of the research, the author concludes that the existence of the mechanism of administrative and legal regulation in the area under study and the functioning of the mechanism are supported by the Bills of Ukraine and other normative and legal acts. The author emphasizes the unconditional appropriateness of the emergence and existence of administrative and legal relations in the field of safety of industrial products. Research materials can be used to improve administrative and legal regulation in the field under study.

**Keywords:** mechanism, administrative and legal regulation, regulations, legal relations.
