## **SYSTEM OF SUBJECTS PROVIDING ADMINISTRATIVE AND LEGAL SUPPORT FOR INFORMATION SECURITY IN THE CUSTOMS SPHERE**

The article is devoted to the disclosure of the system of subjects of administrative and legal support of information security in the customs sphere. The author proposes to consider the system of subjects providing administrative-legal information security in the customs sphere as a complex integral multilevel formation, each level of which is characterized by a system of interrelated subjects. Five levels of subjects have been identified as well as the peculiarities of each level's subjects have been analyzed. In the article the current normative-legal regulation concerning the question of the legal status of the subjects of researched system is opened, separate normative lacks in the specified sphere are marked.

Furthermore, it was noted that this issue is not properly regulated, and the special legal acts regulating the implementation of customs affairs and the realization of customs interests, including ensuring information security in this area, do not contain provisions on the regulation of this issue. However, according to the Law of Ukraine "On National Security of Ukraine" dated 21.06.2018 № 2469-VIII, citizens of Ukraine take part in the implementation of civil control through public associations, of which they are members, through the deputies of local councils, personally by appealing to the authorized representative of the Verkhovna Rada of Ukraine for human rights or state bodies in the manner prescribed by the Constitution of Ukraine, the Law of Ukraine "On Public Associations" and other laws of Ukraine.

Thus, the list of subjects of administrative and legal support of information security in the customs sphere is quite broad, containing subjects with different legal status and legal nature of powers. Precisely taking into account the above mentioned,

it is difficult to build all subjects into a single system. In addition, the issues of public control in this area is quite relevant, and one of the major directions of further development of legal regulation in this sphere is the design of special forms and methods of implementation of such control is to ensure information security in the customs sphere, the definition of the legal result and forms of response of other subjects of administrative and legal support of information security in the customs sphere to acts of civil control.

**Key words:** administrative and legal support, customs sphere, information security, subjects, system of subjects, public control.
