system in Ukraine, as key components of state policy to combat criminal threats, require systematic development of security analytics, including strategic analysis of key areas of security and social development. Emphasis is placed on the results of the interdepartmental working group on preparation of proposals to improve the functioning of the criminal justice system, which initiated a strategic analysis based on risk-oriented approach and appropriate analytical tools to form conceptual directions and tasks for further improvement of the criminal justice system of Ukraine.

Attention is focused on the results of the ON-LINE survey of the expert community formed of employees of the criminal justice system, law enforcement agencies and higher education institutions with specific learning conditions. Emphasis is placed on the limitation of the sample from the general complex of experts on the basis of a logical error check, which ensured the statistical significance, reliability and representativeness of further analysis.

The risks of the spread of threats in the criminal justice system have been assessed and the most significant threats have been identified on the basis of their rating and size limits. The analysis of threats was carried out according to their appropriate grouping. Assessment of the capabilities of the criminal justice system, emphasis is placed on the vulnerabilities of law enforcement agencies to the spread of criminal threats. Conclusions are made on the basis of the analysis of data on specificity of the activities of expert groups.

**Keywords:** criminal justice, law enforcement agencies, risk, threat, ability, vulnerability.
