FRANCE'S EXPERIENCE OF PROTECTING CHILDREN IN THE DIGITAL ENVIRONMENT

In the context of the rapid development of the modern information society, where the World Wide Web is an integral part of modern life, the number of risks and dangers in the Internet environment does not decrease. Due to deficiencies in legal regulation of child protection, the digital environment becomes a convenient "field" for illegal activities.

Therefore, ensuring the safety of the child while staying in the digital environment is becoming one of the important and urgent needs, which is not only to create modern protective mechanisms on the way of offenders to their potential victims, but also to carry out active preventive and educational work among children ~ potential victims.

The article examines the experience of France in protecting children in the digital environment. In particular, the separate corpus delicti of crimes committed

through the telecommunication network, where the child is a special object of criminal law protection, are considered.

The continuous work of state and non-state actors on possible ways to protect minors from online risks is outlined. The article analyzes the legislation on the responsibilities of Internet service providers (ISPs), as well as the involvement of the education sector, in particular, educational institutions in the protection of the youngest Internet users.

The paper notes that the French government pays much attention to the introduction of educational measures to raise awareness of children, parents, teachers about possible risks and dangers in the digital environment. In order to achieve this goal, many useful online platforms have been created, including on the website of the Ministry of the Interior, where one can find not only useful information and advice from experts, but also report to the Ministry of the Interior hotline about harmful content or illegal behavior encountered by a person (including a child) when using the Internet. The author emphasized the expediency of borrowing the experience of France in the field of ensuring the safety of children in the digital environment.

Keywords: child, harassment, Internet, content, pornography, minor, provider, digital environment.
