

Додаткові політичні вказівки щодо реалізації цього Закону містяться в Циркулярі А-119, опублікованому на вебсайті ЕРА 27 січня 2016 р. Політика Цирюляра А-119 спрямована на заохочення федеральних агентств до використання досвіду приватного сектора, заохочення участі федеральних агенцій в органах зі стандартизації для підтримки створення стандартів, які можуть використовуватися федеральними агентствами [11].

Таким чином, слід зазначити, що роботи зі стандартизації захищають суспільні інтереси, оскільки розробники стандартів, акредитовані ANSI, і розроблені ними стандарти мають відповідати вимогам Інституту щодо відкритості, збалансованості, консенсусу та належної правової процедури, а також розробники стандартів повинні дотримуватися нейтральної позиції, гарантуючи, що всі мають можливість брати участь у розробці стандарту.

Consider the general structure of ANSI. It should also be noted that this institute is the main body of the USA that coordinates the work of industrial, private and government institutions that develop national standards of the USA. It also emphasizes that ANSI is the only organization authorized to accredit other US standards organizations.

A brief historical background on the founding of ANSI is provided, as well as information on the sources of funding for the institute's activities.

Considered the main tasks of ANSI, which are to improve the competitiveness of American business and the quality of life of Americans by ensuring the proper coordination and promotion of the system of voluntary standardization of the United States. Also, ANSI ensures that American businesses and industries maintain adequate levels of products, services and processes.

We will analyze the main requirements for due legal procedure. These requirements apply to consensus-building activities for the approval, revision, confirmation, and withdrawal of American National Standards (ANS).

It is emphasized that ANSI's main task is to improve the competitiveness of American business and the quality of life of Americans by ensuring the proper coordination and promotion of the US voluntary standardization system. Also, ANSI ensures that American businesses and industries maintain adequate levels of products, services and processes.

We can note the due process under which the Institute operates and protects the public interest, as ANSI-accredited standards developers and the standards they develop must meet ANSI's requirements for openness, balance, consensus, and due process.

**Keywords:** legal procedures, ANSI, American standards, association of standards developers, private standards.
